-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3712

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 and 21-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are indefinite because it is not clear whether they are drawn to the combination of the toy balloon valve and valve adapter, or to only the subcombination of the valve adapter. This is because although the claims appear at first to be drawn to the subcombination (note line 1 of claim 1 for example only), they recite limitations that are structurally dependent on the toy balloon valve (note the "size" limitation in claim 1 lines 4-5, and the entire recitation in claim 2, for example only). Although in this office action the subcombination is presumed to be claimed (and accordingly, all references to the toy balloon valve are considered to be statements of intended use that do not structurally limit the claimed adapter) clarification of the scope of the claims is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3712

Claims 1-15 and 21-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Rossi. The claimed balloon valve adapter reads on either of the adapters 18 and 25 of Rossi. Since the adapters of Rossi have all of the structural elements of the claims, including a larger and smaller end, continuous wall defining a cavity, first and second openings at the ends thereof, etc., they are presumed to be inherently capable of all of the claimed functions such as use with some toy balloon valve. In the event Rossi is deemed not to show some of the elements of the dependent claims, it is considered that it would have been obvious to provide these for the Rossi device in order to make it function more effectively for its intended purpose, or as a design expedient.

5. Claims 16-20 are allowed.
